Good morning,

The Pre-RD group has started fish tracking activities for the day at RM 2. Included is a photo of the crew retrieving the cable from the shore as the vessel retreats back to water to locate the acoustic release. The crew is now preparing to download the data and exchange the battery for AR-A01. The Pre-RD group has 8 (new) batteries for today and is waiting for the rest of the batteries to arrive from Michigan this afternoon. If the batteries do not arrive tonight, the crew plans on postponing fish tracking activities until Thursday (1/17).

Jonni
